

EMPIRE BUILD
CONTRACTING COMPANY

MECHANICAL WORKS PROFILE

Installation support for construction and infrastructure

SAUDI ARABIA | EST. 2020 | CR 7055381839

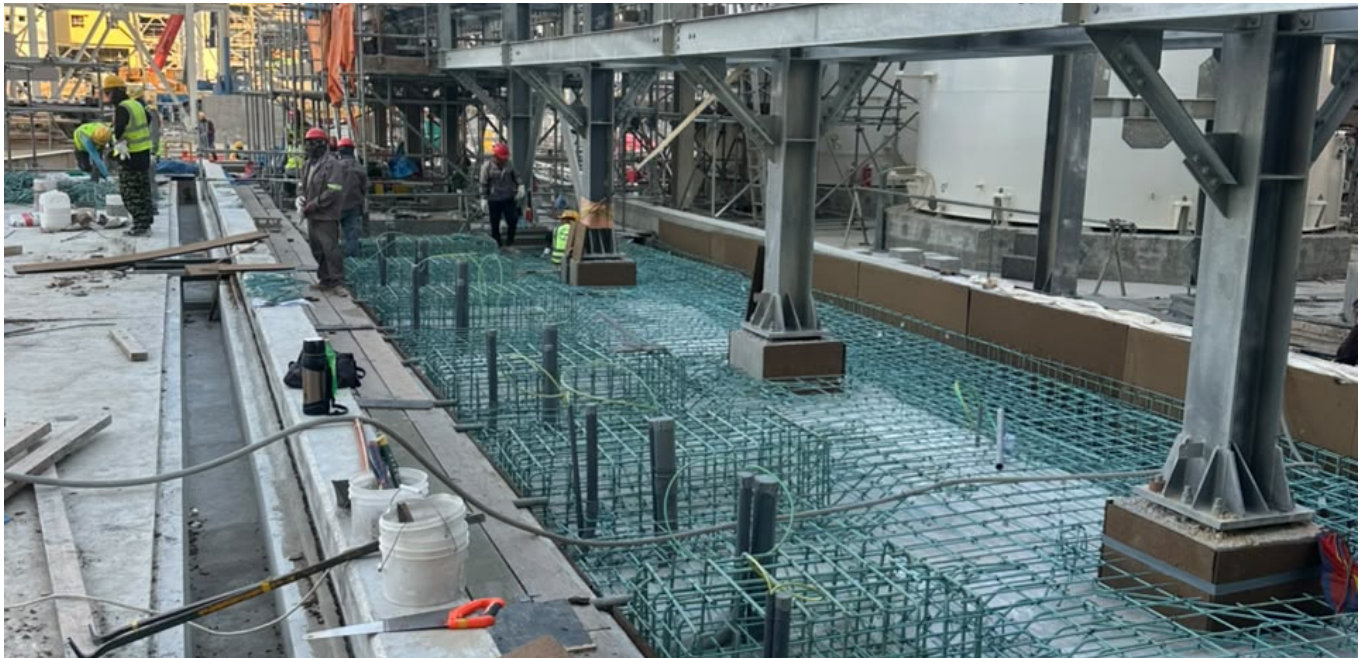

Civil. Mechanical. Electrical. Renewable energy. People. Logistics.

COMPANY INTRODUCTION

A clear scope. A practical approach.

Empire Build Contracting Company aims to provide mechanical installation and infrastructure support for construction and industrial projects in Saudi Arabia. Enquiries are reviewed against the actual scope, technical responsibilities and resource requirements.

Existing supplied or website photograph; not assigned to a named contract.

Company at a glance

Established 2020 | Commercial Registration 7055381839 | Kingdom of Saudi Arabia. Chief Executive Officer: Shahzeb Khan.

Scope basis

The supplied interchange reference includes HDPE pipes and duct pipes. This remains Civil/Infrastructure experience and is not claimed as completed mechanical-process piping experience.

SERVICE CAPABILITIES

Support tailored to the requirement.

Equipment installation support

Review equipment requirements, foundation interfaces, handling access and installation sequence. Assistance is arranged within the agreed method, competent resources and supervision.

Piping and installation interfaces

Consider pipe installation support, supports and related interfaces where included in the agreed package. Material types, joining methods and inspection responsibilities must be defined before work starts.

Maintenance and general support

Review maintenance and installation enquiries individually, including isolation requirements, access, skills and acceptance criteria.

Work-package boundaries

The agreed scope defines technical responsibility, personnel, equipment, inspection and acceptance requirements. Availability and commercial terms are confirmed for each enquiry.

EXECUTION AND SITE RESPONSIBILITY

Plan, coordinate and verify.

Understand the requirement

Review the scope, issued drawings, programme, location and site constraints. Clarify interfaces and responsibilities before committing resources.

Prepare and mobilise

Agree the method, resource plan, access arrangements and reporting contacts. Coordinate permits, induction and required inspection points.

Quality assurance and quality control

Use applicable drawings and approved requirements. Record agreed checks, report discrepancies and close outstanding items before handover.

Health, Safety and Environment

Review task hazards, communicate controls and coordinate PPE, permits, plant movement and work-area arrangements with the site team. Follow project emergency and environmental requirements.

Communication and completion

Track progress, raise constraints early and confirm changes through the responsible project team. Submit the agreed completion information.

Project-specific controls

This overview describes intended working practices. It is not a signed HSE policy or a claim of external certification. The applicable project requirements govern execution.

EXPERIENCE AND SCOPE BASIS

Relevant experience and interfaces

REFERENCE 01

Construction of HW-392 Trumpet IC-1, HW-55, and Camp City Diamond Interchanges 2 & 3

Project No. 4800001197

NEOM, Highway 55, Saudi Arabia

HDPE pipe and duct pipe installation within the civil/infrastructure package. This is an interface reference, not a completed mechanical-process piping contract.

Civil / Infrastructure

Developing mechanical capability

Mechanical installation and maintenance enquiries are reviewed separately. Technical competence, resources and the work boundaries must be confirmed before engagement.

Reference and scope note

The supplied interchange reference includes HDPE pipes and duct pipes. This remains Civil/Infrastructure experience and is not claimed as completed mechanical-process piping experience.

CONTACT INFORMATION

Let us build what comes next.

EMPIRE BUILD CONTRACTING COMPANY

Discuss your site, scope and programme with our team. Share available drawings, quantities, access conditions and required delivery dates so we can review the requirement and prepare the next steps.
